DRESSING FOR WORK MADE EASY

Wear your values.

In a world where sustainability is more than a trend, our garments made from Recycled Polyester or Lyocell represent a conscious shift towards environmentally responsible fashion.

By choosing City Collection, your business not only invests in high-performance fabrics but also commits to reducing environmental impact without compromising style or quality.

2175 City Stretch® Spot Hi-Lo
Recycled Polyester/ Polyester with Natural Stretch
Sizes: 6 - 30

ECO-DRIVEN FASHION

Transforming Waste into Wearable Solutions

- ✓ City Collection's dedicated research brings the world's most innovative fabrics to you, with a focus on unwavering quality.
- ✓ Every garment in this look-book is made using recycled polyester, created by transforming plastic bottles into high-performance fibres. 5 plastic drink bottles yield enough fibre for one pair of jeans.
- ✓ This eco-conscious process not only ensures premium uniforms but also helps reduce plastic waste in landfills, giving these materials a second life.

A SMARTER WAY TO SOURCE FABRICS

Soft, Durable and Sustainable.

Crafted from 65% Lyocell, these garments are:

- super soft
- breathable
- designed for a longer fit
- easy to wear, and
- highly durable

Our denim shirts offer lasting comfort while supporting your eco-conscious values.

(soft denim)

**COMFORT MEETS
CONSCIOUSNESS**

Design for a Greener Future.

THE JEANS

Our R Jeans combine modern style with ethical production and sustainability. With a mid-rise, slim straight leg, internal elastic waistband, and 4-Way Stretch, they offer 360-degree comfort. Pre-washed for extra softness and built to last, R Jeans provide long-lasting wear without compromising on comfort.

Polyester/Recycled Polyester
Sizes: 6 - 30

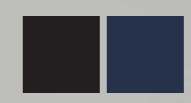

GRS-certified 100% recycled polyester yarn from post-consumer PET bottles. Regen is Korea's first product using technology to extract and recycle PET bottle ingredients.

Fifty bottles produce 1kg of yarn. As the world's first GRS-certified recycled polyester fibre, Regen reduces landfill waste and CO² emissions while matching virgin polyester in quality and function.

THE SMART CHOICE FOR SCRUBS

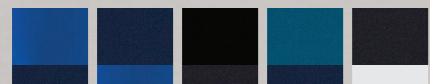

Our antibacterial fabric protection keeps your garments fresh! Because it inhibits bacterial growth, it reduces odours. It also extends your garments life, cuts down on washing, and supports a more sustainable wardrobe.

DRESSING FOR WORK MADE EASY

Tailored Uniforms

Choose fabric Fit For Purpose

Choose the perfect fabric for your industry and specific roles. Whether easy care + easy wear, an anti-bacterial finish, recycled polyester, traditional cotton or other, we have the capability to fulfil your request.

Measure Up The Team For Best Fit

Our custom service means we can make sizes outside of our regular size range. So you can measure your clients with the peace-of-mind that we accommodate all shapes and sizes.

Customise For Brand Colours

An important selling point for uniforms is the ability to incorporate a clients brand colour into the mix. Full block, patterns or customised trims, we can manufacture our garments to enhance their brand.

Have Their Logo Embroidered

For greater impact, we can have your garments embroidered with your clients' logo. It's a fantastic finishing touch that ties together the team.

Easy & Prompt Delivery

At City Collection we understand timelines. Once we finalise your order, we are on the job ensuring you reach your deadlines. When you order, we deliver.

Upparel Partnership

We have partnered with Upparel to offer a program to ensure your unwanted items have a second life through their unique reuse and recycling model to help close the loop on textile waste. A recycle bin is located at Head Office and we have worked with individual resellers to support this program.

Our Commitment

We are working at each and every stage of our chain, from how we design our products, choose the materials, choose our suppliers to manufacture the garments, all the way to packaging and logistics. It is a process of continuous improvement.

Our aim is to foster change within the industry for a more circular future. We are committed to this improvement every day and don't want that to change.
